Professional Summary

Bsc.(Hons.) Computing candidate with hands on experience building data driven and machine learning solutions using Python, SQL, Pandas, NumPy, Scikit-learn and TensorFlow/Keras. Experienced across the end-to-end ML workflow, including data cleaning, exploratory analysis, feature engineering, model development, evaluation and visualization, with additional experience deploying data applications using Streamlit. Projects span customer analytics, predictive modeling, computer vision and real world data analysis. Recognized as a Star Performer during a data visualization internship and awarded a \$1,000 scholarship for exceptional performance. Seeking to develop industry ready expertise across Data Science, AI/ML and data engineering through a practical, real world environment.

Core Skills

Programming & Data : Python, SQL, Pandas, Numpy, Data Cleaning, Data Preprocessing, EDA, Feature Engineering

Machine Learning: Scikit-learn, Supervised Learning, Unsupervised Learning, Predictive Modeling, Model Evaluation, Cross Validation, Hyperparameter Tuning, PCA

Algorithms : Linear Regression, Logistic Regression, Decision Trees, Random Forest, KNN, SVM, Naive Bayes, XGBoost

Deep Learning & Computer Vision: Tensorflow, Keras, CNNs, Image Classification, Image Preprocessing, Pillow/PIL

Data Visualization & Deployment : Matplotlib, Seaborn ,Excel, Streamlit, Github, Jupyternotebook, GoogleCollab

Professional Skills: Teamwork & Learning Agility, Analytical thinking, Time management

Projects Experience

Whatsapp Conversation Analyzer

[\[Link\]](#)

- Built an interactive data analysis application that processes WhatsApp chat exports to extract meaningful communication and activity patterns.
- Deployed the application using Streamlit, converting a data analysis workflow into an accessible end user application.

Churn Retention Intelligence Engine

[\[Link\]](#)

- Built a customer churn prediction solution using Python and machine learning.
- Performed exploratory data analysis to identify customer behavior patterns.
- Created visualizations to communicate customer behavior patterns and analytical findings.

Brain Tumor Detection Using CNN

[\[Link\]](#)

- Developed a CNN based image classification system to identify brain tumor patterns from medical images.
- Trained and evaluated the model using appropriate performance metrics.
- Investigated model predictions and performance to assess classification effectiveness.

Fraud Detection in Financial Transactions

[\[Link\]](#)

- Developed a machine learning pipeline to detect fraudulent financial transactions in a highly imbalanced dataset, applying data cleaning, exploratory analysis and feature engineering to identify transaction anomalies.
- Compared multiple classification models including Random Forest, SVM and XGBoost, using imbalance handling techniques and precision, recall, F1-score and ROC-AUC to evaluate fraud detection performance.

Experience

Data visualization Associate Intern

Saint Louis University

- Communicated insights effectively through visual storytelling to support strategic decision making and developed dashboards and reports to support data driven decision making.
- Conducted data cleaning, EDA and created dashboards to uncover patterns, trends, and correlations.
- Recognized as Star Performer, earning a \$1000 scholarship for exceptional performance during the internship.

HPAIR 2025 Delegate

Harvard Project For Asian and International Relations

- Engaged with industry experts in technology, leadership and policy discussions.
- Collaborated on international case studies, developing strategic solutions and presenting findings.
- Expanded cross cultural communication, teamwork, and critical thinking skills through global networking.

Education

BSc (Hons) Computing

The British College Affiliated with Leeds Beckett University, Kathmandu, Nepal

Sep 2023 – Oct 2027

GPA : 3.8/4.0
